## OVERVIEW

---

A motivated full-stack developer with a particular interest in frontend development, UI design, and a strong foundation in working with React and TypeScript. I enjoy creating intuitive, visually appealing user interfaces and have experience across both frontend and backend technologies. Eager to apply my skills and continue growing as a developer.

## WORK EXPERIENCE

---

### Associate Software Engineer

*Hargreaves Lansdown*

January 2024 – present

- Developed and maintained multiple frontend projects using React and Typescript, implementing a range of tests with Jest and Vitest.
- Proactively suggested and implemented UI improvements, as well as resolved bugs to enhance user experience and performance.
- Researched and presented new platform ideas for the external charity “Let’s Talk About Loss”.
- Led retrospective meetings, driving continuous improvement within the team.
- Supported a backend developer in learning frontend technologies, providing guidance on React and TypeScript best practices.

### Apprentice Software Engineer

*Hargreaves Lansdown*

September 2022 – January 2024

- Completed a full-stack software development apprenticeship ahead of schedule, achieving a distinction.
- Advocated for apprenticeships by presenting to work experience students and participating in an apprenticeship fair.
- Presented to stakeholders during sprint reviews, highlighting project progress and optimisation opportunities.
- Assisted QA testers by supporting automated testing efforts using Playwright.

## EDUCATION

---

### Software Engineering Level 4

#### apprenticeship standard (Distinction)

Multiverse

September 2022 – January 2024

## SKILLS

---

- **Frontend Development:** React, TypeScript, JavaScript, HTML, CSS
